Dominique Nix

SUMMARY

Fast-learning, adaptable individual with a B.S. in Psychology experienced in problem-solving and effective communication due to direct customer service/patient care. Looking to use the experience gained from UT Austin's Fullstack Coding Certification Program to enter into a new career field that can utilize my current skills and aid me in acquiring new expertise.

TECHNICAL SKILLS

- HTML
- CSS and Frameworks (Bootstrap, Tailwind, Materialize)
- Javascript
- OOP
- Node.js
- Express.js
- MySQL
- Sequelize
- ORM
- MVC
- Handlebars
- PWA
- MongoDB
- Mongoose
- React
- Material UI
- MERN Stack Applications
- GitHub
- Figma

PROJECTS

WhichWord

A more user interactive Wordle inspired game that allows users to choose difficulty level and play without the 24-hour break. This was created using HTML, CSS, JavaScript, and third party APIs.

- GitHub Repo: <https://github.com/Dominique216/Word-Guessing-Game>
- Website URL: <https://whichword.herokuapp.com/>

Tech-Blog

A FullStack blog site that requires signup or login. Once logged in, users can view existing posts and comments, add comments, and add, update, or delete their posts. This was made using Node, Express, MySQL, Sequelize, Handlebars, and Bootstrap.

- GitHub Repo: <https://github.com/Dominique216/Tech-Blog>
- Website URL: <https://tech-blog-014.herokuapp.com/>

ProPairs

ProPairs is a FullStack MERN application that evaluates users based on their personality type and generates a rating of how well they will work together with one another based on their Myers-Briggs personality type. It was made using React, Material UI, mongoDB, mongoose, node, and express.
